CAUTION

RISK OF ELECTRIC SHOCK
DO NOT OPEN

CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK DO NOT REMOVE COVER (OR BACK).
NO USER-SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

In extreme weather (storms, lightning) and long inactivity periods (going on holiday) disconnect the TV set from the mains.

The mains plug is used to disconnect the TV set from the mains and therefore it must remain readily operable. If the TV set is not disconnected electrically from the mains, the device will still draw power for all situations even if the TV is in standby mode or switched off.

Note: Follow the on screen instructions for operating the related features.

IMPORTANT - Please read these instructions fully before installing or operating

⚠ **WARNING: This device is intended to be used by persons (including children) who are capable / experienced of operating such a device unsupervised, unless they have been given supervision or instruction concerning the use of the device by a person responsible for their safety.**

- Use this TV set at an altitude of less than 5000 metres above the sea level, in dry locations and in regions with moderate or tropical climates.

- The TV set is intended for household and similar indoor use but may also be used in public places.

- For ventilation purposes, leave at least 5cm of free space around the TV.

- The ventilation should not be impeded by covering or blocking the ventilation openings with items, such as newspapers, table-cloths, curtains, etc.

- The power cord/plug should be easily accessible. Do not place the TV, furniture, etc. on the power cord. A damaged power cord/plug can cause fire or give you an electric shock. Handle the power cord by the plug, do not unplug the TV by pulling the power cord. Never touch the power cord/plug with wet hands as this could cause a short circuit or electric shock. Never make a knot in the power cord or tie it with other cords. When damaged it must be replaced, this should only be done by qualified personnel.

- Do not expose the TV to dripping or splashing of liquids and do not place objects filled with liquids, such as vases, cups, etc. on or over the TV (e.g. on shelves above the TV).

- Do not expose the TV to direct sunlight or do not place open flames such as lit candles on the top of or near the TV.

- Do not place any heat sources such as electric heaters, radiators, etc. near the TV set.

- Do not place the TV on the floor or inclined surfaces.

- To avoid danger of suffocation, keep plastic bags out of the reach of babies, children and domestic animals.

- Carefully attach the stand to the TV. If the stand is provided with screws, tighten the screws firmly to prevent the TV from tilting. Do not over-tighten the screws and mount the stand rubbers properly.

- Do not dispose of the batteries in fire or with hazardous or flammable materials.

WARNING

- Batteries must not be exposed to excessive heat such as sunshine, fire or the like.

- Excessive sound pressure from earphones or headphones can cause hearing loss.

ABOVE ALL - NEVER let anyone, especially children, push or hit the screen, push anything into holes, slots or any other openings in the TV.

⚠ Caution	Serious injury or death risk
⚡ Risk of electric shock	Dangerous voltage risk
⚠ Maintenance	Important maintenance component

Mains Supply

The set should be operated only from a 220-240 V AC 50 Hz outlet. Make sure the TV or its stand are not placed on the power cord. DO NOT cut off the mains plug from this equipment, this incorporates a special Radio Interference Filter, the removal of which will impair its performance. In the UK, the fuse fitted in this plug is approved by ASTA or BSI to BS1362. It should only be replaced by a correctly rated and approved type. IF IN DOUBT PLEASE CONSULT A COMPETENT ELECTRICIAN.

Markings on the Product

The following symbols are used on the product as a marker for restrictions and precautions and safety instructions. Each explanation shall be considered where the product bears related marking only. Note such information for security reasons.

▢ **Class II Equipment:** This appliance is designed in such a way that it does not require a safety connection to electrical earth.

⚡ **Hazardous Live Terminal:** The marked terminal(s) is/are hazardous live under normal operating conditions.

⚠ℹ **Caution, See Operating Instructions:** The marked area(s) contain(s) user replaceable coin or button cell batteries.

CLASS 1 LASER PRODUCT

Class 1 Laser Product: This product contains Class 1 laser source that is safe under reasonably foreseeable conditions of operation.

WARNING

- Do not ingest the battery, Chemical Burn Hazard.

- This product or the accessories supplied with the product may contain a coin/button cell battery. If the coin/button cell battery is swallowed, it can cause severe internal burns in just 2 hours and can lead to death.

- Keep new and used batteries away from children.

- If the battery compartment does not close securely, stop using the product and keep it away from children.

- If you think batteries might have been swallowed or placed inside any part of the body, seek immediate medical attention.

━ ━ ━ ━ ━ ━ ━ ━ ━ ━ ━ ━

A television may fall, causing serious personal injury or death. Many injuries, particularly to children, can be avoided by taking simple precautions such as:

- ALWAYS use cabinets or stands or mounting methods recommended by the manufacturer of the television set.

- ALWAYS use furniture that can safely support the television set.

- ALWAYS ensure the television set is not overhanging the edge of the supporting furniture.

- ALWAYS educate children about the dangers of climbing on furniture to reach the television set or its controls.

- ALWAYS route cords and cables connected to your television so they cannot be tripped over, pulled or grabbed.

- NEVER place a television set in an unstable location.

- NEVER place the television set on tall furniture (for example, cupboards or bookcases) without anchoring both the furniture and the television set to a suitable support.

- NEVER place the television set on cloth or other materials that may be located between the television set and supporting furniture.

- NEVER place items that might tempt children to climb, such as toys and remote controls, on the top of the television or furniture on which the television is placed.

- The equipment is only suitable for mounting at heights ≤2 m.

If the existing television set is going to be retained and relocated, the same considerations as above should be applied.

━ ━ ━ ━ ━ ━ ━ ━ ━ ━ ━ ━

Apparatus connected to the protective earthing of the building installation through the MAINS connection or through other apparatus with a connection to protective earthing – and to a television distribution system using coaxial cable, may in some circumstances create a fire hazard. Connection to a television distribution system has therefore to be provided through a device providing electrical isolation below a certain frequency range (galvanic isolator).

WALL MOUNTING WARNINGS

- Read the instructions before mounting your TV on the wall.

- The wall mount kit is optional. You can obtain from your local dealer, if not supplied with your TV.

- Do not install the TV on a ceiling or on an inclined wall.

- Use the specified wall mounting screws and other accessories.

- Tighten the wall mounting screws firmly to prevent the TV from falling. Do not over-tighten the screws.

Figures and illustrations in these operating instructions are provided for reference only and may differ from the actual product appearance. Product design and specifications may be changed without notice.

Environmental Information

This television is designed to be environmentally friendly. To reduce energy consumption, you can follow these steps:

If you set the **Energy Saving** to **Minimum**, **Medium**, **Maximum** or **Auto** the TV will adjust the energy consumption accordingly. Set as **Off** to turn this setting off. If you like to set the backlight to a fixed value set as **Custom**, highlight the **Backlight** (will be located under the **Energy Saving** setting) and then adjust manually using Left or Right directional buttons on the remote.

Note: Available Energy Saving options may differ depending on the selected Mode in the Settings>Picture menu.

The **Energy Saving** settings can be found in the **Settings>Picture** menu. Note that some picture settings will be unavailable to be changed.

You can also turn the screen off using the **Screen Off** option, if you want to hear the sound only and don't need to watch. If pressed Right button or Left button consecutively **Screen Off** option will be selected and "**Screen will be off in 15 seconds.**" message will be displayed on the screen. Select **Proceed** and press **OK** to turn the screen off immediately. If you don't press any button, the screen will be off in 15 seconds. Press any button on the remote or on the TV to turn the screen on again.

Note: Screen Off option is not available if the Mode is set to Game.

When the TV is not in use, please switch off or disconnect the TV from the mains plug. This will also reduce or stop the energy consumption.

Features

- Remote controlled colour TV
- Fully integrated digital terrestrial TV (DVB-T-T2)
- HDMI inputs to connect other devices with HDMI sockets
- USB input
- OSD menu system
- Stereo sound system
- Teletext
- Headphone connection
- Automatic programming system
- Manual tuning
- Automatic power down after up to eight hours.
- Sleep timer
- Child lock
- Automatic sound mute when no transmission.
- NTSC playback
- AVL (Automatic Volume Limiting)
- PLL (Frequency Search)
- Game Mode (Optional)
- Picture off function
- Ethernet (LAN) for Internet connectivity and service
- 802.11 a/b/g/n built in WLAN Support
- Audio Video Sharing
- HbbTV

Ultra HD (UHD)

TV supports Ultra HD (Ultra High Definition - also known as 4K) which provides resolution of 3840 x 2160 (4K:2K). It equals 4 times the resolution of Full HD TV by doubling the pixel count of the Full HD TV both horizontally and vertically. Ultra HD content is supported via native and market applications, HDMI, USB input(s) and over DVB-T2 broadcasts.

High Dynamic Range (HDR) / Hybrid Log-Gamma (HLG)

Using this feature the TV can reproduce greater dynamic range of luminosity by capturing and then combining several different exposures. HDR/HLG promises better picture quality thanks to brighter, more realistic highlights, more realistic colour and other improvements. It delivers the look that filmmakers intended to achieve, showing the hidden areas of dark shadows and sunlight with full clarity, colour and detail. HDR/HLG content is supported via native and market applications, HDMI and USB inputs. Set the related HDMI source input as **Enhanced** from the **Sources** option in the **Settings>System** menu or from the **Sources>Source Settings** menu in order to watch HDR/HLG content, if the HDR/HLG content is received through an HDMI input. The source device should also be at least HDMI 2.0a compatible in this case.

Dolby Vision

Dolby Vision™ delivers a dramatic visual experience, astonishing brightness, exceptional contrast, and vivid colour, that brings entertainment to life. It achieves this stunning image quality by combining HDR and wide colour gamut imaging technologies. By increasing the brightness of the original signal and using a higher dynamic colour and contrast range, Dolby Vision presents amazing true-to-life images with stunning detail that other post-processing technologies in the TV aren't able to produce. Dolby Vision is supported via native and market applications, HDMI and USB inputs. Set the related HDMI source input as **Enhanced** from the **Sources** option in the **Settings>System** menu or from the **Sources>Source Settings** menu in order to watch Dolby Vision content, if the Dolby Vision content is received through an HDMI input. The source device should also be at least HDMI 2.0a compatible in this case. In the **Settings>Picture>Mode** menu two pre-defined picture modes will be available if Dolby Vision content is detected: **Dolby Vision Bright** and **Dolby Vision Dark**. Both allow the user to experience the content in the way the creator originally intended with different ambient lighting conditions.

Accessories Included

- Remote Control
- Batteries: 2 x AAA
- Operating Instructions
- Quick Start Guide
- Power Cord

Standby Notifications

If the TV does not receive any input signal (e.g. from an aerial or HDMI source) for 3 minutes, it will go into standby. When you next switch-on, the following message will be displayed: **"TV switched to stand-by mode automatically because there was no signal for a long time."** You can disable this functionality by setting the **No Signal Timer** option in the **Settings>System>Device Settings** menu accordingly.

The **Auto Power Down** option (in the **Settings>System>More** menu) could have been set to a value between 1 and 8 hours by default. If this setting is not set as Off and the TV has been left on and not been operated during the set time, it will switch into standby mode after the set time has expired. When you next switch-on the TV, the following message will be displayed: **"TV switched to stand-by mode automatically because no operation was made for a long time."** Before the TV switches into standby mode a dialogue window will be displayed. If you do not press any button the TV will switch into the standby mode after a waiting period of about 5 minutes. You can highlight **Yes** and press **OK** to switch the TV into standby mode immediately. If you highlight **No** and press **OK**, the TV will remain

on. You can also choose to cancel the **Auto Power Down** function from this dialogue. Highlight **Disable** and press **OK**, the TV will remain on and the function will be set as **Off**. You can enable this function again by changing the setting of the **Auto Power Down** option from the **Settings>System>More** menu.

TV Control Button & Operation
Note: The position of the control button may differ depending on the model.

Your TV has a single control button. This button allows you to control the Standby-On / Source / Programme and Volume functions of the TV.

Operating with the Control Button

- Press the control button to display the function options menu.

- Then press the button consecutively to move the focus to the desired option if needed.

- Press and hold the button for about 2 seconds to activate the selected option. The icon colour of the option changes when activated.

- Press the button once again to use the function or enter the sub menu.

- To select another function option, you will need to deactivate the last activated option first. Press and hold the button to deactivate it. The icon colour of the option changes when deactivated.

- To close the function options menu do not press the button for a period of about 5 seconds. The function options menu will disappear.

To turn the TV off: Press the control button to display the function options menu, the focus will be on the **Standby** option. Press and hold the button for about 2 seconds to activate this option. The icon colour of the option changes when activated. Then press the button once again to turn the TV off.

To turn on the TV: Press the control button, the TV will turn on.

To change volume: Press the control button to display the function options menu and then press the button consecutively to move the focus to **Volume +** or **Volume -** option. Press and hold the button for about 2 seconds to activate the selected option. The icon colour of the option changes when activated. Then press the button to increase or decrease the volume.

To change channel: Press the control button to display the function options menu and then press the button consecutively to move the focus to **Programme +** or **Programme -** option. Press and hold the button for about 2 seconds to activate the selected option. The icon colour of the option changes when activated. Then press the button to switch to the next or previous channel in the channel list.

To change source: Press the control button to display the function options menu and then press the button consecutively to move the focus to **Source** option. Press and hold the button for about 2 seconds to activate this option. The icon colour of the option changes when activated. Then press the button once again to display the sources list. Scroll through the available sources by pressing the button. TV will automatically switch to the highlighted source.

Note: Main menu OSD cannot be displayed via the control button.

Operation with the Remote Control

Press the **Home** button on your remote control to display main menu. Use the directional buttons and **OK** button to navigate and set. Press **Back/Return, Exit** or **Home** button to quit a menu screen.

Input Selection

Once you have connected external systems to your TV, you can switch to different input sources. Press the **Source** button on your remote control consecutively to select the different sources.

Changing Channels and Volume

You can change the channel and adjust the volume by using the **Programme +/-** and **Volume +/-** buttons on the remote.

Forced Standby

If your TV stops responding to commands, you can perform forced standby which will terminate the process. In order to do this, press and hold the **Standby** button on remote control for about 5 seconds.

Using Main TV Menu

When the **Home** button is pressed, the main TV menu will appear on the screen. You can navigate through the menu items using the directional buttons on the remote. To select an item or see the sub-menu options of the highlighted menu press **OK** button. When you highlight a menu option some of the sub-menu items of this menu may appear on the upper side of the menu bar for quick access. To use a quick access item highlight it, press **OK** and set as desired using the Left/ Right directional buttons. When finished press **OK** or **Back/Return** button to exit.

You can also see information on location, weather, time and date on the main TV menu screen. The green small icons indicate the current status for time, network and sync for apps. If these icons appears in green, it means

that the time information is successfully updated. Network is connected and sync is successfully completed. Otherwise the icons will appear in white.

Press **Exit** button to close the main menu.

1. Home

When main menu is opened **Home** menu bar will be highlighted. The content of the **Home** menu can be customised by adding options from other menus. Just highlight an option and press the Down directional button on the remote. If you see **Add to Home** option you can add it to the **Home** menu. To delete or change the position of any item in the Home menu, Select **Edit Home** from the **TV** menu. The **Edit** menu will be displayed. Select an item, press **OK** and select **Delete** or **Move** option and press **OK**. In order to move a menu item use the Right and Left directional buttons to select the position that you want the item to move to and press **OK**.

2. Search

You can search for Channels, Guide, TV menus, Applications, Web, YouTube and Videos using this option. Press **OK** and enter a key word using the virtual keyboard. Then highlight **OK** and press **OK** to start the search. Results will be displayed on the screen. Highlight the desired result using the directional buttons and press **OK** to open.

3. TV

3.1. Freeview Play

Connects to the Freeview Play platform where you can access available catch-up TV services (only appears when the TV is connected to the internet).

3.2. Guide

You can access the electronic programme guide menu using this option. Refer to **Electronic Programme Guide** section for more information.

3.3. Channels

You can access the **Channels** menu using this option. Refer to **Using the Channel List** section for more information.

3.4. Timers

You can set timers for future events using the options of this menu. You can also review the previously created timers under this menu.

To add a new timer select the **Add Timer** tab using the Left/Right buttons and press **OK**. Set the sub-menu options as desired and when finished press **OK**. A new timer will be created.

To edit a previously created timer, highlight that timer, select the **Edit Selected Timer** tab and press **OK**. Change the sub-menu options as desired and press **OK** to save your settings.

To cancel an already set timer, highlight that timer, select **Delete Selected Timer** tab and press **OK**. A confirmation message will be displayed. Highlight **Yes** and press **OK** to proceed. The timer will be cancelled.

It is not possible to set timers for two or more events that will broadcasted at the same time interval. In this case you will be informed and the timer will be cancelled.

3.5. Edit Home

You can customise the content of the **Home** menu using this option. Highlight and press **OK**. The **Home** menu will switch to edit mode. Refer to the **Home** section for details.

3.6. More Apps

In order to manage the apps installed on your TV, you can use this option. Highlight and press **OK**. You can add an installed app to **Home** menu, launch or remove it. Highlight an app and press **OK** to see the available options.

3.7. Market

You can add new apps from the application market using this option. Highlight and press **OK**. Available apps will be displayed. You can also access the application market from within the **More Apps** menu.

3.8. Reset Apps

You can reset your customisations on the **Home** menu to defaults using this option (availability depends on TV model and its features). Highlight and press **OK**. A confirmation message will be displayed. Highlight **Yes** and press **OK** to proceed. Note that you will not be able to perform this operation again within the next few minutes.

3.9. Accessibility

You can access the accessibility settings menu directly using this option.

3.10. Privacy Settings

You can access the privacy settings menu directly using this option. This option may not be available depending on the model of your TV and the selected country during the first time installation process.

4. Settings

You can manage the settings of your TV using the options of this menu. Refer to **Settings Menu Content** section for more information.

5. Sources

You can manage your input source preferences using the options of this menu. To change the current source highlight one of the options and press **OK**.

5.1. Source Settings

You can access the source settings menu directly using this option. Edit the names, enable or disable selected source options. There are also **Regular** and **Enhanced** options available for HDMI sources. **Regular** and **Enhanced** options are affecting the colour settings of the selected HDMI source.

Inserting the Batteries into the Remote

Remove the screw that secures the battery compartment cover on the back side of the remote control first. Insert two size **AAA** batteries. Make sure the (+) and (-) signs match (observe correct polarity). Do not mix old and new batteries. Replace only with same or equivalent type. Place the cover back on. Then secure the cover again with the screw.

A message will be displayed on the screen when the batteries are low and must be replaced. Note that when the batteries are low, the performance of the remote control may be impaired.

Batteries should not be exposed to excessive heat such as sunshine, fire or the like.

Power Connection

IMPORTANT: The TV set is designed to operate on a **220-240V AC, 50 Hz** supply. After unpacking, allow the TV set to reach the ambient room temperature before you connect the set to the mains.

Plug one end (the two-hole plug) of the supplied detachable power cord into the power cord inlet on the rear side of the TV as shown above. Then plug the other end of the power cord into the mains socket outlet.

Note: The position of the power cord inlet may differ depending on the model.

Antenna Connection

Connect the aerial TV plug to the aerial input (ANT) socket located on the left side of the TV.

Left side of the TV
ANT

> If you want to connect a device to the TV, make sure that both the TV and the device are turned off before making any connection. After the connection is done, you can turn on the units and use them.

Disposal Information

[European Union]

These symbols indicate that the electrical and electronic equipment and the battery with this symbol should not be disposed of as general household waste at its end-of-life. Instead, the products should be handed over to the applicable collection points for the recycling of electrical and electronic equipment as well as batteries for proper treatment, recovery and recycling in accordance with your national legislation and the Directive 2012/19/EU and 2013/56/EU.

By disposing of these products correctly, you will help to conserve natural resources and will help to prevent potential negative effects on the environment and human health which could otherwise be caused by inappropriate waste handling of these products.

For more information about collection points and recycling of these products, please contact your local municipal office, your household waste disposal service or the shop where you purchased the product.

Penalties may be applicable for incorrect disposal of this waste, in accordance with national legislation.

[Business users]

If you wish to dispose of this product, please contact your supplier and check the terms and conditions of the purchase contract.

[Other Countries outside the European Union]

These symbols are only valid in the European Union.

Contact your local authority to learn about disposal and recycling.

The product and packaging should be taken to your local collection point for recycling.

Some collection points accept products free of charge.

Note: The sign Pb below the symbol for batteries indicates that this battery contains lead.

Specification

Digital Reception	Fully integrated digital terrestrial TV(DVB-T) (DVB-T2 compliant)
Number of Preset Channels	1000
Channel Indicator	On Screen Display
RF Aerial Input	75 Ohm (unbalanced)
Operating Voltage	220-240V AC, 50Hz.
Audio	DTS-HD DTS Virtual:X Dolby Atmos
Audio Output Power (WRMS.) (10% THD)	2 x 10
Power Consumption (W)	135W
Networked Standby Mode Power Consumption (W)	< 2
TV Dimensions DxLxH (with stand) (mm)	221 x 1119 x 692
TV Dimensions DxLxH (without stand) (mm)	66 x 1119 x 648
Display	50"
Operation temperature and operation humidity	0ºC up to 40ºC, 85% humidity max

Wireless LAN Transmitter Specifications

Frequency Ranges	Max Output Power
2400 - 2483.5 MHz (CH1 - CH13)	< 100 mW
5150 - 5250 MHz (CH36 - CH48)	< 200 mW
5250 - 5350 MHz (CH52 - CH64)	< 200 mW
5470 - 5725 MHz (CH100 - CH140)	< 200 mW

Country Restrictions

The Wireless LAN equipment is intended for home and office use in all EU countries, the UK and Northern Ireland (and other countries following the relevant EU and/or UK directive). The 5.15 - 5.35 GHz band is restricted to indoor operations only in the EU countries, in the UK and Northern Ireland (and other countries following the relevant EU and/or UK directive). Public use is subject to general authorisation by the respective service provider.
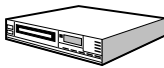

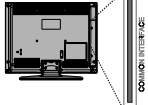

Country	Restriction
Russian Federation	Indoor use only

The requirements for any country may change at any time. It's recommended that user checks with local authorities for the current status of their national regulations for both 2.4 GHz and 5 GHz wireless LAN's.
1. **Standby:** Switches On / Off the TV

2. **Numeric buttons:** Switches the channel, enters a number or a letter in the text box on the screen.

3. **Language:** Displays and changes audio/subtitle language and turns subtitles on or off (digital TV, where available)

4. **Mute:** Completely turns off the volume of the TV

5. **Volume +/-**

6. **Guide:** Displays the electronic programme guide

7. **Directional buttons:** Helps navigate menus, content, etc. and displays the subpages in TXT mode when pressed Right or Left

8. **OK:** Confirms user selections, holds the page (in TXT mode), views **Channels** menu (DTV mode)

9. **Back/Return:** Returns to previous screen, previous menu, opens index page (in TXT mode). Quickly cycles between previous and current channels or sources

10. **Netflix:** Launches the Netflix application

11. **Prime Video:** Launches the Amazon Prime Video application

12. **Twitch:** Launches the Twitch application

13. **Coloured Buttons:** Follow the on-screen instructions for coloured button functions

14. **Rewind:** Moves frames backwards in media such as movies

15. No function

16. **Play:** Starts to play selected media

17. **Stop:** Stops the media being played

18. **Pause:** Pauses the media being played

19. **Fast Forward:** Moves frames forward in media such as movies

20. **Freeview Play:** Connects to the Freeview Play platform where you can access available catch-up TV services

21. **Rakuten TV:** Launches the Rakuten TV application

22. **YouTube:** Launches the YouTube application

23. **Exit:** Closes and exits from displayed menus or returns to previous screen

24. **Info:** Displays information about on-screen content, shows hidden information (reveal - in TXT mode)

25. **Home:** Displays TV menu

26. **Source:** Shows available broadcast and content sources

27. **Programme +/-**

28. **Text:** Displays teletext (where available), press again to superimpose the teletext over a normal broadcast picture (mix)

Connector	Type	Cables	Device
	HDMI Connection (side&back)		
SPDIF	SPDIF (Optical Out) Connection (back)		
HEADPHONE	Headphone Connection (back)		
	USB Connection (side)		
	CI Connection (side)		CAM module
LAN	Ethernet Connection (back)	LAN / Ethernet Cable	

When using the wall mounting kit (available from a third party in the market, if not supplied), we recommend that you plug all your cables into the back of the TV before mounting on the wall. Insert or remove the CI module only when the TV is SWITCHED OFF. You should refer to the module instruction manual for details of the settings. The/Each USB input of your TV supports devices up to 500mA. Connecting devices that have current value above 500mA may damage your TV. When connecting equipment using a HDMI cable to your TV, to guarantee sufficient immunity against parasitic frequency radiation and trouble-free transmission of high definition signals, such as 4K content, you have to use a high speed shielded (high grade) HDMI cable with ferrites.

If you want to connect a device to the TV, make sure that both the TV and the device are turned off before making any connection. After the connection is done, you can turn on the units and use them.

Switching On/Off

To Switch the TV On

Connect the power cord to a power source such as a wall socket (220-240V AC, 50 Hz).

To switch on the TV from standby mode either:

• Press the **Standby** button, **Programme +/-** or a numeric button, **Guide** button, **Netflix** button or **Freeview Play** button on the remote control.

• Press the control button on the TV.

To Switch the TV Off

• Press the **Standby** button on the remote control.

• Press the control button on the TV, the function options menu will be displayed. The focus will be on the **Standby** option. Press and hold the button for about 2 seconds to activate this option. The icon colour of the option will change. The icon colour of the option changes when activated. Then press the button once again to turn the TV off.

To power down the TV completely, unplug the power cord from the mains socket.

Note: When the TV is switched into standby mode, the standby LED can blink to indicate that features such as Standby Mode Search, Over Air Download or Timer is active. The LED can also blink when you switch on the TV from standby mode.

First Time Installation

When turned on for the first time, the language selection screen is displayed. Select the desired language and press **OK**. In the following steps of the installation guide, set your preferences using the directional buttons and **OK** button.

After the language selection, you will be asked whether you want to change accessibility settings. Highlight **Yes** and press **OK** to change. Refer to **System Menu Content** section for detailed information on available options.

Set your country preference on the next screen. Depending on the country selection you may be asked to set and confirm a PIN at this point. The selected PIN cannot be 0000. You have to enter it if you are asked to enter a PIN for any menu operation later.

You can activate **Store Mode** option in the next step. This option will configure your TV's settings for store environment and depending on the TV model being used, the supported features of it may be displayed on the screen as an info banner. This option is intended only for store use. It is recommended to select **Home Mode** for home use. **Store mode** option will be available in **Settings>System>More** menu and can be turned off/on later. Make your selection and press **OK** to continue.

Depending on the model of your TV, the picture mode selection screen may appear at this point. In order for your TV to consume less energy and be more environmentally friendly select **Natural** and press **OK** to continue. If you select **Dynamic** and press **OK**, a confirmation dialogue will be displayed. Select **Yes** and press **OK** to proceed. You can change your selection later using the **Mode** option in the **Settings>Picture** menu.

Depending on the model of your TV and the country selection **Privacy Settings** screen may appear at this point as well activating Parental Control. Using the options on this screen you can set your privacy privileges. Highlight a feature and use Left and Right directional buttons or **OK** button to enable or disable. Read the related explanations displayed on the screen for each highlighted feature before making any changes. You can use **Programme +/-** buttons to scroll up and down to read the entire text. You will be able to change your preferences at any time later from the **Settings>System>Privacy** menu. If the **Internet Connection** option is disabled **Network/Internet Settings** screen will be skipped and not displayed. If you have any questions, complaints or comments regarding this privacy policy or its enforcement, please contact by email at smarttvsecurity@vosshub.com.

Highlight **Next** and press **OK** button on the remote control to continue and the **Network/Internet Settings** screen will be displayed. Please refer to **Connectivity** section if you need information on configuring a wired or a wireless connection (availability depends on the model) and other available options. If you want your TV to consume less power in standby mode, you can disable the **Networked Standby Mode** option by setting it as **Off**. After the settings are completed highlight **Next** and press **OK** button to continue.

On the next screen you need to agree to the terms and conditions of Freeview Play to make use of the related services. Scroll the page to read the entire text using the up/down directional buttons or **Programme +/-** buttons. Highlight **Yes** and press **OK** on the remote to confirm and proceed. Highlight **No** and press **OK** to proceed without confirmation. For further requirements for Freeview Play services refer to the **Freeview Play Platform** section.

On next screen you can set broadcast types to be searched, set your encrypted channel searching and time zone (depending on the country selection) preferences. Additionally you can set a broadcast type as your favourite one. Priority will be given to the selected broadcast type during the search process and the channels of it will be listed on the top of the channel list. When finished, highlight **Next** and press **OK** to continue.

About Selecting Broadcast Type

To turn a search option on for a broadcast type highlight it and press **OK**, Left or Right directional button. The checkbox next to the selected option will be checked. To turn the search option off clear the checkbox by

pressing **OK**, Left or Right directional button after moving the focus on the desired broadcast type option.

Digital Aerial: If **D. Aerial** broadcast search option is turned on, the TV will search for digital terrestrial broadcasts after other initial settings are completed.

After the initial settings are completed the TV will start to search for available broadcasts of the selected broadcast types.

While the search continues current scan results will be displayed at the bottom of the screen. You can press the **Home**, **Back** or **Exit** button to cancel the search. The channels that have already been found will be stored in the channel list.

After all the available stations are stored, **Channels** menu will be displayed. You can edit the channel list according to your preferences using the **Edit** tab options or press the **Home** button to quit and watch TV.

While the search continues a dialogue may appear, asking whether you want to sort channels according to the LCN**(*)**. Select **Yes** and press **OK** to confirm.

(*) LCN is the Logical Channel Number system that organises available broadcasts in accordance with a recognisable channel number sequence (if available).

Note: Do not turn off the TV while initialising first time installation. Note that, some options may not be available depending on the country selection.

Media Playback via USB Input

You can connect 2.5" and 3.5" inch (HDD with external power supply) external hard disk drives or USB memory stick to your TV by using the USB input(s) of the TV.

IMPORTANT! Back up the files on your storage devices before connecting them to the TV. Manufacturer will not be responsible for any file damage or data loss. Certain types of USB devices (e.g. MP3 Players) or USB hard disk drives/memory sticks may not be compatible with this TV. The TV supports FAT32 and NTFS disk formatting.

Wait a little while before each plugging and unplugging as the player may still be reading files. Failure to do so may cause physical damage to the USB player and the USB device itself. Do not pull out your drive while playing a file.

You can use USB hubs with your TV's USB input(s). External power supplied USB hubs are recommended in such a case.

It is recommended to use the TV's USB input(s) directly, if you are going to connect a USB hard disk.

*Note: When viewing media files the **Media Browser** menu can only display a maximum of 1000 media files per folder.*

Media Browser

You can play back music and movie files and display photo files stored on a USB storage device by connecting it to your TV. Connect a USB storage device to the USB input located on the side of the TV.

After connecting a USB storage device to your TV **Sources** menu will be displayed on the screen. Select the related USB input option from this menu and press **OK**. **Media Browser** menu will be displayed on the screen. Then select the file of your choice and press **OK** to display or play it back. You can access the content of the connected USB device any time later from the **Sources** menu. You can also press the **Source** button on the remote and then select your USB storage device from the list of sources.

You can set your media browser preferences by using the **Settings** menu. **Settings** menu can be accessed via the information bar which is displayed on the bottom of the screen while playing back a video or an audio file or displaying a picture file. Press the **Info** button if the information bar has disappeared, highlight the gear wheel symbol positioned on the right side of the information bar and press **OK**. **Picture Settings**, **Sound Settings**, **Media Browser Settings** and **Options** menus may be available depending on the media file type and the model of your TV and its features. The content of these menus may also differ according to the type of the currently open media file. Only **Sound Settings** menu will be available while playing back audio files.

Loop/Shuffle Mode Operation	
Start playback and activate 🔁	All files in the list will be continuously played in original order
Start playback and activate 🔂	The same file will be played continuously (repeat)
Start playback and activate 🔀	All files in the list will be played once in random order
Start playback and activate 🔁, 🔀	All files in the list will be continuously played in the same random order

To use the functions on the information bar highlight the symbol of the function and press **OK**. To change the status of a function highlight the symbol of the function and press **OK** as much as needed. If the symbol is marked with a red cross, that means it is deactivated.

FollowMe TV

With your mobile device you can stream the current broadcast from your smart TV using the **FollowMe TV** feature. Install the appropriate Smart Center application to your mobile device. Start the application.

For further information on using this feature refer to the instructions of the application you use.

Note: Depending on model, your TV may not support this function. The application may not be compatible with all mobile devices. Both of the devices must be connected to the same network. This feature is only functional on TV source.

CEC

This function allows the user to control the CEC-enabled devices, that are connected through HDMI ports by using the remote control of the TV.

The **CEC** option in the **Settings>System>Device Settings** menu should be set as **Enabled** at first. Press the **Source** button and select the HDMI input of the connected CEC device from the **Sources List** menu. When a new CEC source device is connected, it will be listed in **Sources** menu with its own name instead of the connected HDMI port's name (such as DVD Player, Recorder 1, etc.).

The TV remote is automatically able to perform the main functions after the connected HDMI source has been selected. To terminate this operation and control the TV via the remote again, press and hold the "0-Zero" button on the remote control for 3 seconds.

You can disable the CEC functionality by setting the related option under the **Settings>System>Device Settings** menu accordingly.

The TV supports ARC (Audio Return Channel). This feature is an audio link meant to replace other cables between the TV and an audio system (A/V receiver or speaker system).

When ARC is active, the TV will mute its other audio outputs, except the headphone jack, automatically and volume control buttons are directed to the connected audio device. To activate ARC set the **Sound Output** option in the **Settings>Sound** menu as **HDMI ARC**.

Note: ARC is supported only via the HDMI2 input.

Enhanced Audio Return Channel (eARC)

Similar to ARC, the eARC feature enables the transfer of the digital audio stream from your TV to a connected audio device via the HDMI cable. eARC is an improved version of ARC. It has a much higher bandwidth than its predecessor. Bandwidth represents the range of frequencies or amount of data that is being transferred at a time. Higher bandwidth translates into a higher amount of data that can be transferred. Higher bandwidth also means that digital audio signal doesn't have to be compressed and is much more detailed, rich, and vibrant.

When eARC is enabled from the sound menu, TV first tries to establish eARC link. If eARC is supported by the connected device, the output turns into eARC mode and the "eARC" indicator can be observed on the connected device's OSD. If an eARC link cannot be established (for example, the connected device is not supporting eARC but supporting ARC only) or if eARC is disabled from the sound menu, then TV initiates ARC.

For eARC to function properly;

• The connected audio device should also support eARC.

• Some HDMI cables do not have enough bandwidth to carry high-bit-rate audio channels, use an HDMI cable with eARC support (HDMI High Speed Cables with Ethernet and the new Ultra High Speed HDMI Cable - check hdmi.org for latest info).

• Set the **Sound Output** option in the **Settings>Sound** menu to **HDMI ARC**. The **eARC** option in the **Sound** menu will be enabled. Check to see if it is set to **On**. If not, set it to **On**.

Note: eARC is supported only via the HDMI2 input.

System Audio Control

Allows an Audio Amplifier/Receiver to be used with the TV. The volume can be controlled using the remote control of the TV. To activate this feature set the **Sound Output** option in the **Settings>Sound** menu as **HDMI ARC**. When **HDMI ARC** option is selected, **CEC** option will be set as **Enabled** automatically, if it is not already set. The TV speakers will be muted and the sound of the watched source will be provided from the connected sound system.

Note: The audio device should support System Audio Control feature.

Game Mode

You can set your TV to achieve lowest latency for games. Go to **Settings>Picture** menu and set the **Mode** option to **Game**. **Game** option will be available when the TV's input source is set to HDMI. When set the picture will be optimised for low latency.

Auto Low Latency Mode

You can also enable the **ALLM** (Auto Low Latency Mode) option in the **Settings>System>Device Settings** menu. If this function is enabled the TV automatically switches the picture mode to **Game** when ALLM mode signal is received from the current HDMI source. TV switches back to previous picture mode setting when the ALLM signal is lost. So you won't need to change the settings manually.

If the **ALLM** option is enabled, picture mode can not be changed as long as ALLM signal is received from the current HDMI source.

In order for the ALLM feature to be functional the related HDMI source setting should be set to **Enhanced**. You can change this setting from the **Sources>Source Settings** menu or from the **Settings>System>Sources** menu.

E-Manual

You can find instructions for your TV's features in the E-Manual.

To access the E-Manual, enter **Settings** menu, select **Manuals** and press **OK**. For quick access press **Home** button and then **Info** button.

By using the directional buttons select a desired topic and press **OK** to read instructions. To close the E-Manual screen press the **Exit** or **Home** button.

Note: Depending on model, your TV may not support this function. The content of the E-Manual may vary according to the model.

Settings Menu Content

Picture Menu Content

Mode		You can change the picture mode to suit your preference or requirements. Picture mode can be set to one of these options: **Cinema**, **Game**, **Sports**, **Dynamic** and **Natural**. *Note: Available options may differ depending on the input source.* **Dolby Vision Modes:** If Dolby Vision content is detected **Dolby Vision Dark** and **Dolby Vision Bright** picture mode options will be available instead of **Cinema** and **Natural** modes.
	Contrast	Adjusts the light and dark values on the screen.
	Brightness	Adjusts the brightness values on the screen.
	Sharpness	Sets the sharpness value for the objects displayed on the screen.
	Colour	Sets the colour value, adjusting the colours.
Energy Saving		For setting the **Energy Saving** to **Custom**, **Minimum**, **Medium**, **Maximum**, **Auto**, **Screen Off** or **Off**. *Note: Available options may differ depending on the selected Mode.*
	Backlight	This setting controls the backlight level. This option will be available (located under the Energy Saving setting) if the **Energy Saving** is set to **Custom**. Highlight and use Left/Right directional buttons to set.
Picture Zoom		Sets the desired image size format.
	Picture Shift	This option may be available (located under the Picture Zoom setting) depending on the **Picture Zoom** setting. Highlight and press **OK**, then use directional buttons to shift the picture upwards or downwards.
Advanced Settings		
	Dynamic Contrast	You can change the dynamic contrast ratio to desired value.
	Colour Temp	Sets the desired colour temperature value. **Cool**, **Normal**, **Warm** and **Custom** options are available.
	White Point	If the **Colour Temp** option is set as **Custom**, this setting will be available (located under the Colour Temp setting). Increase the 'warmth' or 'coolness' of the picture by pressing Left or Right buttons.
	Blue Stretch	White colour enhancement function that makes white colour more cooler in order to make more bright picture. Set as **On** to enable.
	Micro Dimming	**Low**, **Medium**, **High** and **Off** options are available. While **Micro Dimming** is active, it will enhance contrast locally for each defined zone.
	Noise Reduction	**Low**, **Medium**, **High** and **Off** options are available. If the signal is weak and the picture is noisy, use the **Noise Reduction** setting to reduce the amount of noise.
	Film Mode	Films are recorded at a different number of frames per second to normal television programmes. Turn this feature to Auto when you are watching films to see the fast motion scenes clearly.
	MEMC	Press left/right buttons to set **MEMC** to **Low**, **Medium**, **High** or **Off**. While **MEMC** is active, it will optimise the TV's video settings for motional images to acquire a better quality and readability.
	MEMC Demo	When **MEMC** option is set to **Low**, **Medium** or **High**, this option will be available. Press **OK** button to activate the demo mode. While demo mode is active, the screen will be divided into two sections, one displaying the **MEMC** activity, the other displaying the normal settings for TV screen. Press **OK** button again to cancel.

Skin Tone	Skin tone can be changed between -5 and 5.
Colour Shift	Adjust the desired colour tone.
Colour Tuner	Opens colour tuner settings. Set the **Colour Tuner** as **Enabled** to adjust the **Hue**, **Colour** and **Brightness** values manually.

Gamut Mapping	You can use this option to set the range of colours displayed on your TV screen. When set as **On**, colours are set according to the source signal. When set as **Off**, the TV's maximum colour capacity is used by default (recommended option). *Note: This option may not be available depending on the TV model and its features.*
Gamma	You can use this option to set your gamma preference. Press Left/Right directional buttons to set to **Normal**, **Bright** or **Dark**. *Note: This option may not be available depending on the TV model and its features and you may not be able to change this setting depending on the current content.*
HDMI Full Range	While watching from a HDMI source, this feature will be visible. You can use this feature to enhance blackness in the picture.
Reset	Resets the picture settings to factory default settings (except **Game** mode).

Sound Menu Content	
Dolby Atmos	Your TV supports Dolby Atmos technology. By means of this technology the sound moves around you in three-dimensional space, so you feel like you're inside the action. You will have best experience if input audio bitstream is Atmos. **Auto**, **On** and **Off** options will be available. If set as **Auto**, the TV will switch between **On** and **Off** modes automatically depending on the input audio bitstream information, if the input audio bitstream is Atmos this feature will work as if it is set as **On**. Set as **Off** to disable.
Mode	**Smart**, **Movie**, **Music**, **News** and **Off** options will be available. Set as **Off** to disable. *Note: Some items in Sound menu will be greyed out and unavailable if set to an option other than Off. Settings of some other options may also change depending on the current settings.*
DTS Virtual:X	This feature will enhance your sound experience by providing a virtualisation of surround speakers through your TV's speakers. You can select one of the predefined sound modes. **Music**, **Sports,Cinema** and **Off** options will be available. Set as **Off** to disable. *Note: Some items in Sound menu will be greyed out and unavailable if set to an option other than Off. Settings of some other options may also change depending on the current settings.*
Audio Link	Press **OK** to open the Audio Link menu screen. Using this screen you can discover and connect the sound devices to your TV wirelessly. Refer to **Connecting Other Wireless Devices** section for further information.
Sound Output	Sets the sound output preference. **TV**, **S/PDIF**, **HDMI ARC**, **Headphone Only** and **Lineout** options will be available. There will be no sound output except through the selected option and the headphone jack. Note that, if this option is set as **Headphone Only**, TV speakers will be muted when headphone set is plugged in. When you connect an external amplifier to your TV using the headphone jack, you can select this option as **Lineout**. If you have connected headphones to the TV, set this option as **Headphone Only**. Please ensure before using headphones that this menu item is set to **Headphone Only**. If it is set to **Lineout**, the output from the headphone socket will be set to maximum which could damage your hearing. If **HDMI ARC** option is selected, **CEC** feature will be enabled. *Note: Depending on the selected option some items in Sound menu will appear as greyed out and will be unavailable.*

AVL (Automatic Volume Limiting)	Sets the sound to obtain fixed output level between programmes.
	If the **Mode** menu item is set to an option other than **Off** the **AVL** setting options will change. **Auto**, **Night**, **Normal** and **Off** options will be available. In **Auto** mode the TV will switch to **Normal** or **Night** mode automatically according to the current time information. If no time information is available this option will always function as **Normal**. When the TV switches to **Night** mode for the first time after setting this option as **Auto**, an information bar will pop up on the screen.
	Please note that compared to **Normal** mode **Night** mode provides more aggressive dynamic compression control which is suitable for silent environments.
eARC	When the **Sound Output** option is set to **HDMI ARC**, the **eARC** menu option will be available. Otherwise, it will be greyed out. This option will be set to **On** by default. Set to **Off** to disable. Refer to **CEC** section for more information.
Advanced Settings	
Equalizer	Selects the equalizer mode. Custom settings can be made only when in **User** mode.
Surround Sound	Enables or disables the surround sound mode.
DTS DRC	Dynamic Range Control provides gain adjustment of the source to maintain suitable audible range at both low and high playback levels. It will function only if the source audio format is DTS. Enable or disable the **DTS DRC** by setting as **On** or **Off**.
Sound Mode	You can select a sound mode (if the viewed channel supports).
Digital Out	Sets digital out audio type.
Headphone	Sets headphone volume.
	Please ensure before using headphones that the headphone volume is set to a low level, to prevent damage to your hearing.
Balance	Sets sound balance. This feature will be activated if **Sound Output** option is set as **TV** or **Headphone Only**. Balance item adjusts the balance level of the TV speakers and headphones together.
Reset	Resets some of the sound settings to factory defaults.

Network Menu Content	
Network Type	Disable the network connection or change the connection type.
Scan Wireless Networks	Start a search for wireless networks. This option will be available if the **Network Type** is set as **Wireless Device**.
Disconnect	To disconnect from a wireless network and delete your saved wireless network profile (if previously saved), highlight this option and press **OK**. This option will not be available if you did not connect to a wireless network. Refer to **Connectivity** section for more information.
Press WPS on your wifi router	If your modem/router device has WPS, you can directly connect to it using this option. Highlight this option and press **OK**. Go to your modem/router device and press the WPS button on it to make the connection. This option will be available if the **Network Type** is set as **Wireless Device**.
Internet Speed Test	Start a speed test to check your connection bandwidth. The result will be displayed on the screen when finished.
Advanced Settings	Change the IP and DNS configurations of your TV.
Networked Standby Mode	Enable or disable this feature by setting it as **On** or **Off**.
*Note: For detailed information on the options of this menu refer to the **Connectivity** section.*	

Installation Menu Content	
Automatic channel scan (Retune)	Displays automatic tuning options. **D. Aerial:** Searches and stores aerial DVB stations.
Manual channel scan	This feature can be used for direct broadcast entry.
Network channel scan	Searches for the linked channels in the broadcast system. **D. Aerial:** Searches for aerial network channels.
Signal Information	You can use this menu item to monitor signal related information such as signal level/ quality, network name, etc. for available frequencies.
First time installation	Deletes all stored channels and settings, resets TV to factory settings.

System Menu Content	
Accessibility	Displays accessibility options of the TV. Some options will not be available if no channels are installed.
High Contrast	Increase the contrast of the menu options and texts to make them easier to read. **White-Black, Yellow-Black** and **Off** options will be available.
Hard of Hearing	Enables any special feature sent from the broadcaster.
Audio Description	A narration track will be played for the blind or visually impaired audience. Press **OK** to see all available **Audio Description** menu options. This feature is available only if the broadcaster supports it. *Note: Audio description sound feature is not available in recording or time shifting mode (availability depends on the model of your TV and its features).*
Dialogue Enhancement	This feature provides sound postprocessing options for speech-gated dialogue enhancement. **Off**, **Low**, **Medium** and **High** options will be available. Set according your preference. *Note: This feature has an effect only if input audio format is AC-4 and this effect only applies to TV loudspeaker output.*
Spoken Subtitles	Default preference of spoken subtitles is selected with this setting option. To make spoken subtitles priority higher than normal ones, this option should be set to **On**. This option may not be available depending on the model of your TV.
Magnification	Enables the use of button combinations to magnify the screen. **On** and **Off** options will be available. Set as **On** to enable.Magnification support will be enabled or disabled with long-press of the numeric button **5**. First top-left quadrant of the screen will be zoomed. After the magnification support is enabled, long-press of the numeric buttons **2**, **4**, **6**, **8** will move the zoomed area to up, left, right and down.
Minimap	Minimap is enabled and deactivated by default. It will be activated when **Magnification** feature is enabled. With this option, you can prevent magnification feature from displaying the minimap.
Click Sound	This option enables the key click sound on TV menu. Set to **On** to enable.
Highlight programmes with	
[S] Subtitle	If this option is enabled and if any electronic programme guide event has "Subtitle" access service, these events will be highlighted with another colour.
[SL] Sign Language	If this option is enabled and if any electronic programme guide event has "Sign Language" access service, these events will be highlighted with another colour.
[AD] Audio Description	If this option is enabled and if any electronic programme guide event has "Audio Description" access service, these events will be highlighted with another colour.
Language	You may set a different language depending on the broadcaster and the country.
Conditional Access	Controls conditional access modules when available.
Privacy	
Privacy Settings	Manage your privacy privileges for smart TV related applications. Press **OK** to enter the menu and set according to your preferences.
Show All Cookies	Displays all saved cookies.
Delete All Coo-kies	Deletes all saved cookies.
Do Not Track	You can set your preference regarding the tracking behaviour for HbbTV services using this option.
Parental	Enter correct PIN to change parental settings. You can easily adjust **Menu Lock**, **Maturity Lock**, **Child Lock, Internet Lock** or **Guidance** in this menu. You can also set a new **PIN** or change the **Default CICAM PIN** using the related options. *Note: Some menu options may not be available depending on the country selection in the **First Time Installation**. Default PIN could have been set to 0000 or 1234. If you have defined the PIN (is requested depending on the country selection) during the **First Time Installation** use the PIN that you have defined.*

Date/Time	Sets date and time.
Sources	Edit the names, enable or disable selected source options. There are also **Regular** and **Enhanced** options available for HDMI sources. These options are affecting the colour settings of the selected HDMI source. To be able to watch 4K or HDR/HLG images from an HDMI source related source setting should be set as **Enhanced** if the connected device is compatible with HDMI 2.0 and subsequent versions. Set as **Regular** if the connected device is HDMI 1.4 compatible. Set accordingly or disable the related HDMI source by setting as **Disabled**.
Netflix	If this feature is supported by your TV, you can view your ESN(*) number and deactivate Netflix.*(*) ESN number is an unique ID number for Netflix, created especially to identify your TV.* *Note: For 4K video streaming, a minimum 25Mb/s internet connection speed is required – For an example of the requirements for streaming 4K content you may find more information on the Netflix website (https://help.netflix.com/en/node/13444). When you start to stream video content via the internet the quality of your connection will be analysed and the full HD or 4K quality may take a short time to be realised, or in the event of a slow connection not be possible. You should check your internet capabilities with your internet provider if you are at all unsure.*
Samba ACR	Samba Interactive TV powers recommendations and other apps by gathering data regarding consumption of specific on-screen content to enhance your viewing experience. Using this option you can access Samba Interactive TV settings menu, review Samba TV's Terms of Service, Privacy Policy and manage your advertising preferences, etc. Internet connection will be required in order to access HTML based settings. You can enable or disable Interactive TV at any time from the **Settings>System>Privacy>Privacy Settings** menu by checking or unchecking the check box next to the related item. This option may not be available depending on the selected country during the First Time Installation process, the model of your TV and its features.
Device Settings	
CEC	With this setting you can enable and disable CEC functionality completely. Press Left or Right button to enable or disable the feature.
CEC Auto Power On	This function allows the connected HDMI-CEC compatible device to turn on the TV and switch to its input source automatically. Press **Left** or **Right** button to enable or disable the feature.
Input Device	Press **OK** to open the Input Device menu screen. Using this screen you can discover and connect keyboards and mice to your TV wirelessly. Refer to **Connecting Other Wireless Devices** section for further information. *Note: Your TV may not be compatible with all keyboard and mouse models in the market. For more information contact your local dealer or retail outlet where you bought your TV.*
ALLM	ALLM (Auto Low Latency Mode) function allows the TV to activate or deactivate low latency settings depending on playback content. If this option is enabled the picture mode will be set to **Game** automatically when ALLM mode signal is received from the current HDMI source. Refer to **Game Mode** section for more information.
No Signal Timer	If your TV does not receive any input signal (e.g. from an aerial or HDMI source) for 3 minutes, it will go into standby mode. You can enable or disable this functionality by setting this option accordingly.

Voice Assistant			
	Alexa Built-in		Starts the setup process for this feature manually. If the setup is priorly completed **Alexa Language**, **Alexa On Standby Mode**, **Alexa Home Screen**, **Alexa Alarm Volume** and **Sign Out** options will be available. Refer to **Alexa Ready** section for more information.
		Alexa Language	Sets the language preference for Alexa.
		Alexa On Standby Mode	Enables or disables Alexa On Standby Mode feature. If enabled Alexa will be available while the TV is in standby mode. *Note: This feature may affect your TV's power consumption.*
		Alexa Home Screen	Set as **Off** to disable this feature or choose one of the inactivity periods to enable. **15 min**, **30 min**, **1 hour** and **2 hour** options will be available.
		Alexa Alarm Volume	Sets the volume level for Alexa alarms.
		Sign Out	You can use this option to sign out. If you sign out Alexa Built-in feature will be disabled.
	Works With Alexa		Starts the setup process for this feature manually. If the setup is priorly completed **Change Friendly Name** and **Sign Out** options will be available. Refer to **Alexa Ready** section for more information.
		Change Friendly Name	You can define a new name for your TV using this option.
		Sign Out	You can use this option to sign out. If you sign out Works With Alexa feature will be disabled.
	Google Assistant		Starts the setup process to enable your TV to work with Google Assistant devices. Highlight **Start** and press **OK**. If the setup is priorly completed **Sign Out** option will be available. If you sign out Google Assistant feature will be disabled. Refer to **Google Assistant** section for more information.
More			Displays other setting options of the TV.
	Menu Timeout		Changes timeout duration for menu screens.
	Standby Mode LED		If set as **Off** the standby mode LED will not light up when the TV is in standby mode.
	HBBTV		You can enable or disable this feature by setting it as **On** or **Off**. Refer to **HbbTV System** section for further information.
	Device Identification		When this option is enabled it causes a 'Device ID' to be generated internally for each Web origin visited. When disabled all the current 'Device ID's are cleared for each Web origin that was visited. You can enable or disable this feature by setting it as **On** or **Off**. This feature is available if channels are installed and the country option is set as Norway during the first time installation.
	Software upgrade		Ensures that your TV has the latest software. Press **OK** to see the menu options.
	Application Version		Displays current software version.
	Subtitle Mode		This option is used to select which subtitle mode will be on the screen (**DVB** subtitle / **Teletext** subtitle) if both are available. Default value is **DVB** subtitle. This feature is available if channels are installed and the country option is set as Norway during the first time installation.

Auto Power Down	Sets the desired time for the TV to automatically go into standby mode when not being operated. This option can be set from 1 to 8 hours in steps of 1 hour. You can also disable this option by setting as **Off**.
Store Mode	Select this mode for store display purposes. Whilst **Store Mode** is enabled, some items in the TV menu may not be available.
Audio Video Sharing	This feature allows you to share files stored on your smartphone or tablet pc. If you have a compatible smartphone or tablet pc and the appropriate software is installed, you can share/play photos, music and videos on your TV. See instructions of your sharing software for more information.
Power Up Mode	This setting configures the power up mode preference. **Last State** and **Standby Mode** options are available.
Virtual Remote	Enable or disable the virtual remote feature.
OSS	Displays Open Source Software licence information.
Change Friendly Name	Using this option you can change the device name that is used to identify your TV when connecting a device to the TV wirelessly. The default device name will be restored if the device name is left blank or first time installation is performed.
Remote Diagnostic	Using this option you can allow the technical service to connect to your TV in order to diagnose problems remotely. Highlight this option and press **OK**. A dialogue will be displayed. You can use the **Details** option to learn more. Highlight **Connect** and press **OK** to proceed. A unique number called session code will be created. You need to give this code to the service operator on the phone so that the connection can be established. A small icon will be displayed on the screen as long as the service stays connected to your TV.
Application Priority	You can set your preference regarding the priority between the broadcast applications and CICAM AppMMI applications using this option. In case a CICAM is inserted into the TV and a contention occurs between the applications the priority will be given to the selected type of application.
Dolby Notification	Sets the notification appearance preference for Dolby content. When set as **On**, Dolby logo will be displayed on the screen when Dolby content is detected.

Note: Some options may not be available depending on the model of your TV, its features and the selected country in the First Time Installation.

General TV Operation

Using the Channel List

The TV sorts all stored stations in the channel list. You can edit this channel list, set favourites or set active stations to be listed by using the **Channels** menu options. Press the **OK** button to open the channel list. You can filter the listed channels or make advanced changes in the current list using the **Filter** and **Edit** tab options. Highlight the tab you want and press **OK** to see available options.

In order to add the channel you are currently watching to the **Home** menu, highlight the **Add to Home** option in the **Edit** tab in the **Channels** menu and press **OK**.

Managing the Favourite Lists

You can create four different lists of your favourite channels. Enter the **TV>Channels** menu or press the **OK** button in order to open the **Channels** menu. Highlight the **Edit** tab and press **OK** to see the editing options and select the **Tag/Untag channel** option. Select the desired channel on the list by pressing the **OK** button while the channel is highlighted. You can make multiple choices. You can also use the **Tag/Untag all** option to select all channels on the list. Then press **Back/Return** button to return to the Edit menu options. Select **Add/Remove Favourites** option and press the **OK** button again. Favourite channel list options will be displayed. Set the desired list option to **On**. The selected channel/s will be added to the list. In order to remove a channel or channels from a favourite list follow the same steps and set the desired list option to **Off**.

You can use the filtering function in the **Channels** menu to filter the channels in the channel list permanently according to your preferences. For instance, using the options of the **Filter** tab, you can set one of your four favourite lists to be displayed every time the channel list is opened. The selected filtering options will be shown on the top of the **Channels** menu screen.

Configuring Parental Settings

The **Parental** menu options can be used to prohibit users from viewing of certain programmes, channels and usage of menus. These settings are located in the **Settings> System>Parental** menu.

To display parental lock menu options, a PIN should be entered. After coding the correct PIN, parental setting options will be displayed.

Menu Lock: This setting enables or disables access to all menus or installation menus of the TV.

Guidance: This setting enables or disables access to some of the MHEG applications. Disabled applications can be released by entering the right PIN.

Maturity Lock: If this option is set, the TV gets the maturity information from the broadcast and if this maturity level is disabled, prohibits access to the broadcast.

Note: If the country option in the First Time Installation is set as France, Italy or Austria, Maturity Lock's value will be set to 18 as default.

Child Lock: If this option is set to **On**, the TV can only be controlled by the remote control. In this case the control button on the TV will not work.

Internet Lock: If this option is set to **ON**, the internet using applications will be disabled. Set to **OFF** to release these applications again.

Set PIN: Defines a new PIN number.

Default CICAM PIN: This option will appear as greyed out if no CI module is inserted into the CI slot of the TV. You can change the default PIN of the CI CAM using this option.

Note: Default PIN could have been set to 0000 or 1234. If you have defined the PIN (is requested depending on the country selection) during the First Time Installation use the PIN that you have defined.

Some options may not be available depending on the model and/or on the country selection in the First Time Installation.

Electronic Programme Guide

By means of the electronic programme guide function of your TV, you can browse the event schedule of the currently installed channels on your channel list. It depends on the related broadcast whether this feature is supported or not.

To access the programme guide, press the **Guide** button on your remote. You can also use the **Guide** option under **TV** menu.

There are 2 different types of schedule layouts available, **Timeline Schedule** and **Now/Next**. To switch between these layouts highlight the tab with the name of the alternative layout on the upper side of the screen and press **OK**.

Use the directional buttons to navigate through the programme guide. Use the **Back/Return** button to use the tab options on the upper side of the screen.

Timeline Schedule

In this layout option, all events of the listed channels will be displayed by timeline. You can use the directional buttons to scroll through the list of the events. Highlight an event and press **OK** to display event options menu.

Press **Back/Return** button to use available tab options. Highlight **Filter** tab and press **OK** to see the filtering options. To change the layout highlight **Now/Next** and press **OK**. You can use the **Previous Day** and **Next Day** options to display the events of the previous and next day.

Highlight **Extras** tab and press **OK** to access below options.

   Highlight Genre: Displays **Highlight Genre** menu. Select a genre and press **OK**. The events in the

programme guide matching the selected genre will be highlighted.

Guide Search: Displays searching options. Using these options, you can search the programme guide database in accordance with the selected criteria. Matching results will be listed.

Now: Displays current event of the highlighted channel.

Zoom: Highlight and press **OK** to see events in a wider time interval.

Now/Next Schedule

In this layout option, only the current and next events of the listed channels will be displayed. You can use the directional buttons to scroll through the list of the events.

Press **Back/Return** button to use available tab options. Highlight **Filter** tab and press **OK** to see the filtering options. To change the layout highlight **Timeline Schedule** and press **OK**.

Event Options

Use the directional buttons to highlight an event and press **OK** button to display **Options** menu. The following options are available.

Select Channel: Using this option, you can switch to the selected channel in order to watch it. The programme guide will be closed.

More Info: Display detailed information on the selected event. Use up and down directional buttons to scroll through the text.

Set Timer on Event / Delete Timer on Event: Select **Set Timer on Event** option and press **OK**. You can set timers for future events. The event will be added to Timers list. To cancel an already set timer, highlight that event and press the **OK** button. Then select **Delete Timer on Event** option. The timer will be cancelled.

Notes: You cannot switch to any other channel while there is an active timer on the current channel.

It is not possible to set timer for two or more individual events at the same time interval.

Integrated Catch-Up Services

You can enjoy Freeview Play catch-up TV services that work directly through the electronic programme guide. Whilst you are on a channel use the directional buttons to scroll back in time through the timeline-based guide. You will see content from last few days. Available catch-up content may change according to broadcasters and will be marked with a play icon. Highlight the content you want to play back and press the **OK** button.

Make sure that your TV is connected to your home network in order to use the catch-up services. For further information regarding this matter and other requirements for Freeview Play services refer to the **Connectivity** and **Freeview Play Platform** sections.

Teletext Services (where available)

Press the **Text** button to enter. Press again to activate mix mode, which allows you to see the teletext page and the TV broadcast at the same time. Press once more to exit. If available, sections in the teletext pages will become colour-coded and can be selected by pressing the coloured buttons. Follow the instructions displayed on the screen.

Digital Teletext

Press the **Text** button to view digital teletext information. Operate it with the coloured buttons, directional buttons and the **OK** button. The operation method may differ depending on the content of the digital teletext. Follow the instructions displayed on the digital teletext screen. When the **Text** button is pressed again, the TV returns to television broadcast.

MHEG Teletext

With digital terrestrial broadcasting (DVB-T), in addition to pictures and sound, you can also view digital teletext. Digital teletext is sometimes broadcast at the same time with the normal broadcasting.

• Press the **Text** or **Red** button

• The digital teletext information appears

• Operate it with the coloured buttons, directional buttons and **OK** button

The operation method may differ depending on the content of the digital teletext. Follow the instructions displayed on digital teletext screen. Press the **Text** button to return to television broadcast.

BBC Red Button+ (RB+)

While watching BBC channels, press the **Red** button or **Text** button to access **Red Button+** services provided by the BBC. On the opening page you can access BBC's main services such as BBC iPlayer, BBC News, BBC Sport and many others. There are also links to the home pages of the related applications available. Use the navigation buttons on the TV's remote control to move through the application. Press **Exit** button to close and exit.

Software Upgrade

Your TV is capable of finding and updating the software automatically via the broadcast signal or via the internet.

Software upgrade search via user interface

On the main menu select **Settings>System** and then **More**. Navigate to **Software upgrade** and press the **OK** button. Then select **Scan for upgrade** and press **OK** button to check for a new software upgrade.

If a new upgrade is found, it starts to download the upgrade. After the download is completed, a warning will be displayed, press **OK** button to complete software upgrade process and restart TV.

3 AM search and upgrade mode

Your TV will search for new upgrades at 3:00 o'clock if **Automatic scanning** option is set to **Enabled** and if the TV is connected to an aerial signal or to the Internet. If a new software is found and downloaded successfully, it will be installed at the next power on.

Note: Do not unplug the power cord while led is blinking during the reboot process. If the TV fails to come on after the upgrade, unplug, wait for two minutes then plug it back in.

All updates are automatically controlled. If a manual search is carried out and no software is found then this is the current version.

Troubleshooting & Tips

TV will not turn on

Make sure the power cord is plugged in securely to a wall outlet. Press the control button on the TV or the **Standby** button on the remote.

Poor picture

• Check if you have correctly tuned the TV.

• Low signal level can cause picture distortion. Please check antenna connections.

• Check if you have entered the correct channel frequency if you have performed manual tuning.

No picture

• TV is not receiving any signal. Make sure the correct source has been selected.

• Is the antenna connected properly?

• Is the antenna cable damaged?

• Are suitable plugs used to connect the antenna?

• If you are in doubt, consult your dealer.

No sound

• Check if the TV sound is muted. Press the **Mute** button or increase the volume to check.

• Sound is coming from only one speaker. Check the balance settings from the **Sound** menu.

• Check **Sound Output** option is set correctly from **Sound** menu.

Remote control - no operation

• The batteries may be exhausted. Replace the batteries.

• The batteries maybe inserted incorrectly. Refer to the section "Inserting the Batteries into the Remote".

No signal on an input source

• It is possible that no device is connected.

• Check the AV cables and connections from your device.

• Check the device is switched on.

HDMI Signal Compatibility

Source	Supported Signals		Available
HDMI	480i	60Hz	O
	480p	60Hz	O
	576i, 576p	50Hz	O
	720p	50Hz,60Hz	O
	1080i	50Hz,60Hz	O
	1080p	24Hz, 25Hz, 30Hz, 50Hz, 60Hz	O
	3840x2160p	24Hz, 25Hz, 30Hz, 50Hz, 60Hz	O
	4096x2160p	24Hz, 25Hz, 30Hz, 50Hz, 60Hz	O

(X: Not Available, O: Available)

In some cases a signal on the TV may not be displayed properly. The problem may be an inconsistency with standards from the source equipment (DVD, Set-top box, etc.). If you do experience such a problem please contact your dealer and also the manufacturer of the source equipment.

Supported File Formats for USB Mode

Video File Formats

File Extension	Format	
	Video Codec	Audio
.mpg/.mpeg/.dat/.vob	MPEG1/2, H.264, VC1	MPEG Layer 1/2/3, AC3
.ts/.trp/.m2ts	MPEG1/2, H.264, VC1, HEVC/H.265	MPEG Layer 1/2/3, AC3, E-AC3

.dat, .mpg, .mpeg, .vob	DVD Subtitle
.mp4	DVD Subtitle, TEXT

Supported DVI Resolutions

When connecting devices to your TV's connectors by using DVI converter cable (DVI to HDMI cable - not supplied), you can refer to the following resolution information.

	56Hz	60Hz	66Hz	70Hz	72Hz	75Hz
640x480		x				x
800x600	x	x				x
1024x768		x		x		x
1280x768		x				x
1280x960		x				
1360x768		x				
1366x768		x				
1280x1024		x		x		x
1400x1050		x				
1600x900		x				
1920x1080		x				

Connectivity

Wired Connectivity

To Connect to a Wired Network

- You must have a modem/router connected to an active broadband connection.

- Connect your TV to your modem/router via an Ethernet cable. There is a LAN port at the rear (back) of your TV.
1 Broadband ISP connection

2 LAN (Ethernet) cable

3 LAN input on the rear side of the TV

- You might be able to connect your TV to your LAN depending on your network's configuration. In such a case, use an Ethernet cable to connect your TV directly to the network wall outlet.

1 Network wall socket

2 LAN input on the rear side of the TV

Configuring Wired Device Settings

To configure wired connection settings go to the **Settings>Network** menu.

Network Type

Set **Network Type** as **Wired Device** if you are connecting via an Ethernet cable.

Internet Speed Test

Highlight **Internet Speed Test** and press the **OK** button. TV will check the internet connection bandwidth and display the result when complete.

Advanced Settings

Highlight **Advanced Settings** and press the **OK** button. On the next screen you can change the IP and DNS settings of the TV. Highlight the desired one and press Left or Right button to change the setting from **Automatic** to **Manual**. Now you can enter the IP and / or DNS values manually. Select the related item in the drop down menu and enter the new values using the numeric buttons of the remote. Highlight **Save** and press the **OK** button to save settings when complete.

Other Information

The status of the connection will be displayed as **Connected** or **Not Connected** and the current IP address, if a connection is established. The MAC address of your TV will also be displayed on the screen.

Wireless Connectivity

To Connect to a Wireless Network

- You must have a wireless modem/router connected to an active broadband connection.
1 Broadband ISP connection

A Wireless-N router (IEEE 802.11a/b/g/n) with simultaneous 2.4 and 5 GHz bands is designed to increase bandwidth. These are optimised for smoother and faster HD video streaming, file transfers and wireless gaming.

The frequency and channel differ depending on the area.

The transmission speed differs depending on the distance and number of obstructions between the transmission products, the configuration of these products, the radio wave conditions, the line traffic and the products that you use. The transmission may also be cut off or may get disconnected depending on the radio wave conditions, DECT phones or any

other WLAN 11b appliances. The standard values of the transmission speed are the theoretical maximum values for the wireless standards. They are not the actual speeds of data transmission.

The location where the transmission is most effective differs depending on the usage environment.

The TV supports 802.11 a, b, g & n type modems. It is highly recommended that you should use the IEEE 802.11n communication protocol in order to avoid any possible problems while watching videos.

You must change your modem's SSID when there are any other modems around with the same SSID. You can encounter connection problems otherwise. Use a wired connection if you experience problems with a wireless connection.

Configuring Wireless Device Settings

To configure wireless connection settings go to the **Settings>Network** menu.

Network Type

Set **Network Type** as **Wireless Device** to start connection process.

Scan Wireless Networks

Highlight **Scan Wireless Networks** option and press **OK** to start a search for available wireless networks. All found networks will be listed. Highlight your desired network from the list and press **OK** to connect. A network with hidden SSID can not be detected by other devices. If you want to connect to a network with hidden SSID, scroll down the list of detected wireless networks, highlight the **Add New Network** option and press **OK**. Enter the name of the network and select the security type using the related options to connect.

Note: If the modem supports N mode, you should set N mode settings.

If the selected network is password-protected, enter the correct key by using the virtual keyboard. You can use this keyboard via the directional buttons and the **OK** button on the remote control.

Wait until the IP address is shown on the screen. This means that the connection is now established.

Disconnect

If you have connected to a wireless network **Disconnect** option will appear in the **Network** menu and your wireless network profile will also be saved, thus your TV will connect to the same network automatically whenever you switch to wireless connection. To disconnect from a wireless network and delete the saved wireless network profile, highlight **Disconnect** and press **OK**.

Press WPS on your wifi router

If your router has WPS, you can directly connect to the modem/router without entering a password or adding the network first. Highlight **Press WPS on your wifi router** option and press **OK**. Go to your modem/router device and press the WPS button on it to make the connection. You will see a connection confirmation on your TV once the devices have paired. Select **OK** to proceed. No further configuration is required.

Internet Speed Test

Highlight **Internet Speed Test** and press the **OK** button to check your internet connection speed.

Advanced Settings

Highlight **Advanced Settings** and press the **OK** button to open the advanced setting menu. Use directional and numeric buttons to set. The procedure is the same as explained for wired connectivity. Highlight **Save** and press the **OK** button to save settings when complete.

Networked Standby Mode

You can enable or disable the Networked Standby Mode feature by setting this option accordingly. Refer to **Networked Standby Mode** section for further information.

Other Information

The status of the connection will be displayed as **Connected** or **Not Connected** and the current IP address, if a connection is established. The MAC address of your TV will also be displayed on the screen.

Connecting to your mobile device via WLAN

• If your mobile device has WLAN feature, you can connect it to your TV via a router, in order to access the content in your device. For this, your mobile device must have an appropriate sharing software.

Connect your TV to your router by following the steps mentioned in the sections above.

Afterwards, connect your mobile device to the router and then activate the sharing software on your mobile device. Then, select files that you want to share with your TV.

If the connection is established correctly, you will be able to access the shared files installed on your mobile device via the Audio Video Sharing feature of your TV.

Highlight the **Audio Video Sharing** option in the **Sources** menu and press **OK**, available media server devices in the network will be displayed. Select your mobile device and press the **OK** button to continue.

• If available, you can download a virtual remote controller application from the server of your mobile device application provider.

Note: This feature may not be supported on all mobile devices.

Networked Standby Mode

Networked Standby Mode is a standard that allows a device to be turned on or woken up by a network message. The message is sent to the device by a program executed on a remote device connected to the same local area network, such as a smartphone.

To enable this feature set the **Networked Standby Mode** option in the **Network** menu as **On**. It is necessary that both the device, from which the network message will be sent to the TV, and the TV are connected to the same network. Networked Standby Mode feature is only supported for Android OS devices and can only be used via YouTube and Netflix applications.

In order to use this feature the TV and the remote device should be connected at least once while the TV is on. If the TV is powered off, the connection should be re-established, the next time it is switched on. Otherwise this feature will be unavailable. This does not apply, when the TV is switched into the standby mode.

If you want your TV to consume less power in standby mode, you can disable this feature by setting the **Networked Standby Mode** option as **Off**.

Wireless Display

Wireless Display is a standard for streaming video and sound content. This feature provides the ability to use your TV as wireless display device.

Using with mobile devices

There are different standards which enable sharing of screens including graphical, video and audio content between your mobile device and TV.

Press the **Source** button on the remote and switch to **Wireless Display** source.

A screen appears stating that the TV is ready for connection.

Open the sharing application on your mobile device. These applications are named differently for each brand, refer to the instruction manual of your mobile device for detailed information.

Scan for devices. After you select your TV and connect, the screen of your device will be displayed on your TV.

Note: This feature can be used only if the mobile device supports this feature. If you experience problems with the connection check if the operating system version you use supports this feature. There may be incompatibility problems with the operating system versions which are released after the production of this TV. Scanning and connecting processes differ according to the program you use.

Connecting Other Wireless Devices

Your TV supports another short range wireless connection technology too. A pairing is required before using these kind of wireless devices with the TV set. You should do the following to pair your device with the TV:

• Set the device to pairing mode

• Start device discovery on the TV

Note: Refer to the user manual of the wireless device to learn how to set the device to pairing mode.

You can connect audio devices, keyboards and mice wirelessly to your TV. Unplug or switch off any other connected audio device in order for wireless connection feature to work correctly. For audio devices you should use the **Audio Link** option in the **Settings>Sound menu,** for keyboards and mice the **Input Device** option in the **Settings>System>Device Settings menu**. Select the menu option and press the **OK** button to open the related menu. Using this menu you can discover and connect the devices that use the same wireless technology and start to use them. Set the **Device** option to **Enabled** then highlight **Discover** on the bottom side of the menu screen and press **OK** to start the device discovery. Follow the on-screen instructions. A list of available wireless devices will be displayed. Select the device you want to connect from the list and press the **OK**. Highlight **Connect** and press **OK** to connect. If "**Device connected**" message is displayed, the connection is successfully established. If the connection fails try it again.

Note: Your TV may not be compatible with all keyboard and mouse models in the market. For more information contact your local dealer or retail outlet where you bought your TV.

Image transfer and audio streaming

You can also use this type of connection to transfer images or stream audio from your mobile device to your TV.

Pair the mobile device and the TV as described before. Start a device search in your hand-held device. Select your TV from listed devices. Confirm the request for connection on your TV screen and do the same on your hand held device screen. If no pairing is done, image transfer or audio streaming to the TV will not be possible.

The images sent by mobile device will be displayed on the TV without confirmation request, if the image file is suitable. You can also save the image file to a connected USB memory drive or set as boot logo, if this feature is supported and the file is suitable. Press the **Exit** button to terminate displaying the image.

The audio will be routed through the speakers of the TV, after confirmation is given. To start audio streaming unpair the device from your TV if it is paired with your TV previously. After pairing is completed, a confirmation message will be displayed asking whether you want to start audio streaming from your mobile device. Select **Yes** and press the **OK** button on the remote of the TV. If the connection is successful, all audio will be routed through the speakers of the TV. A symbol will appear on the TV screen as long as the audio streaming connection is active. When audio playback on your device is stopped or paused the audio of the active source on the TV will be heard from the speakers of the TV. To terminate the audio streaming, you should turn off the wireless connection of your mobile device.

Close all running applications and all the menus on the TV for a trouble-free transfer. Only image files with sizes smaller than 5 MB and in the following file formats are suitable; *.jpg, .jpeg, .png, bmp*. If a file sent by the mobile device does not suit these requirements, it will not be displayed on the TV.

If the **Audio Video Sharing** option in the **Settings>System>More** menu is disabled, the TV will ignore pairing requests and no information message will be displayed on the screen. If a device is already paired prior to disabling the **Audio Video Sharing** option, it will be able to continue sharing audio/video with the TV even if the **Audio Video Sharing** option is disabled.

Note: Wireless devices may operate within the same radio frequency range and may interfere with one another. To improve the performance of your wireless device place it at least 1 metre away from any other wireless devices.

Connectivity Troubleshooting

Wireless Network Not Available

- Ensure that any firewalls of your network allow the TV wireless connection.

- Try searching for wireless networks again, using the **Network** menu screen.

If the wireless network does not function properly, try using the wired network in your home. Refer to the **Wired Connectivity** section for more information on the process.

If the TV does not function using the wired connection, check the modem (router). If the router does not have a problem, check the internet connection of your modem.

Connection is Slow

See the instruction book of your wireless modem to get information on the internal service area, connection speed, signal quality and other settings. You need to have a high speed connection for your modem.

Disruption during playback or slow reactions

You could try the following in such a case:

Keep at least three metres distance from microwave ovens, mobile telephones, bluetooth devices or any other WLAN compatible devices. Try changing the active channel on the WLAN router.

Internet Connection Not Available / Audio Video Sharing Not Working

If the MAC address (a unique identifier number) of your PC or modem has been permanently registered, it is possible that your TV might not connect to the internet. In such a case, the MAC address is authenticated each time when you connect to the internet. This is a precaution against unauthorised access. Since your TV has its own MAC address, your internet service provider cannot validate the MAC address of your TV. For this reason, your TV cannot connect to the internet. Contact your internet service provider and request information on how to connect a different device, such as your TV, to the internet.

It is also possible that the connection may not be available due to a firewall problem. If you think this causes your problem, contact your internet service provider. A firewall might be the reason of a connectivity and discovery problem while using the TV in Audio Video Sharing mode or while browsing via Audio Video Sharing feature.

Invalid Domain

Ensure that you have already logged on to your PC with an authorised username/password and also ensure that your domain is active, prior to sharing any files in your media server program on your PC. If the domain is invalid, this might cause problems while browsing files in Audio Video Sharing mode.

Using Audio Video Sharing Network Service

Audio Video Sharing feature uses a standard that eases the viewing process of digital electronics and makes them more convenient to use on a home network.

This standard allows you to view and play photos, music and videos stored on the media server connected to your home network.

1. Server Software Installation

The Audio Video Sharing feature cannot be used if the server program is not installed onto your PC or if the required media server software is not installed onto the companion device. Prepare your PC with a proper server program.

2. Connect to a Wired or Wireless Network

See the **Wired/Wireless Connectivity** sections for detailed configuration information.

3. Enable Audio Video Sharing

Enter the **Settings>System>More** menu and enable the **Audio Video Sharing** option.

4. Play Shared Files via Media Browser

Highlight the **Audio Video Sharing** option in the **Sources** menu by using the directional buttons and press **OK**. Available media server devices in the network will be listed. Select one and press **OK** to continue. The media browser will then be displayed.

Refer to the **Media Browser** menu section for further information on file playback.

If a problem occurs with the network, switch your television off at the wall socket and back on again.

PC/HDD/Media Player or any other devices that are compatible should be used with a wired connection for higher playback quality.

Use a LAN connection for quicker file sharing between other devices like computers.

Note: There may be some PC's which may not be able to utilise the Audio Video Sharing feature due to administrator and security settings (such as business PC's).

Apps

You can access the applications installed on your TV from the **Home** menu. Press the **Home** button on the remote, **Home** menu will be displayed. Highlight an app and press **OK** to launch.

In order to manage the apps installed on your TV, you can use the **More Apps** option in the **TV** menu. You can add an installed app to **Home** menu, launch or remove it. Highlight an app and press **OK** to see the available options.

You can add new apps from the application market. To access the market highlight the **Market** option in the **TV** menu and press **OK**. Available apps will be displayed. You can also access the application market from within the **More Apps** menu.

You can reset your customisations on the **Home** menu, including app-related ones, to defaults using the **Reset Apps** option in the **TV** menu (availability depends on TV model and its features). Highlight this option and press **OK**. A confirmation message will be displayed. Highlight **Yes** and press **OK** to proceed. Note that you will not be able to perform this operation again within the next few minutes.

Notes: Possible application dependent problems may be caused by the content service provider.

Third party internet services may change, be discontinued or restricted at any time.

Freeview Play Platform

Freeview Play platform provides catch-up TV and On Demand services. Simply press the **Freeview Play** button on your remote control to connect to the Freeview Play platform.

The Freeview Play platform can also be accessed from the Home and TV menus. Press **Home** button and select **Home** or **TV**. Then highlight **Freeview Play** and press the **OK** button.

You will have to agree to the terms and conditions for Freeview Play services first if you did not agree to them during the **First Time Installation**. Highlight **Yes** and press **OK** on the remote to confirm and proceed.

Integrated TV Player applications will be displayed. Select one and press the **OK** button. Then select a content that you want to play back and press the **OK** button to watch.

Catch-up content can also be accessed and played back directly from the TV Guide. Refer to the section **Electronic Programme Guide** for more information.

Requirements

The Freeview Play services may only be used if the following requirements are fulfilled:

• Connecting the TV to the internet. A minimum broadband speed of 2Mbps is required for proper operation of catch-up and on demand services.

• Agreeing to the terms and conditions of Freeview Play

Note: Freeview Play platform usage will count towards any monthly broadband data allowance. Only selected channels provide 7-day catch-up.

Internet Browser

To use the internet browser, enter the **Home** menu first. Then launch the internet browser application which has an orange coloured logo with earth symbol on it.

In the initial screen of the browser, the thumbnails of the predefined (if any) links to web sites available will be displayed as **Speed Dial** options along with the **Edit Speed Dial** and the **Add to Speed Dial** options.

To navigate the web browser, use the directional buttons on the remote or a connected mouse. To see the browser options bar, move the cursor to the top of the page. **History**, **Tabs** and **Bookmarks** options and the browser bar which contains previous/next buttons, the refresh button, the address/search bar, the **Speed Dial** and the **Vewd** buttons are available.

To add a desired website to the **Speed Dial** list for quick access, move the cursor to the top of the page. The browser bar will appear. Highlight the **Speed Dial** - ▦ button and press the **OK** button. Then select **Add to Speed Dial** option and press the **OK** button. Fill in the blanks for **Name** and **Address**, highlight **OK** and press the **OK** button to add. Whilst you are on the site you wish to add to the **Speed Dial** list, highlight the **Vewd** button and press the **OK** button. Then highlight **Add to Speed Dial** option in the submenu and press the **OK** button again. **Name** and **Address** will be filled automatically according to the site you are visiting. Highlight **OK** and press the **OK** button to add.

You can also use the **Vewd** menu options to manage the browser. Highlight the **Vewd** button and press the **OK** button to see available page specific and general options.

There are various ways to search or visit websites using the web browser.

Enter the address of a website(URL) into the search/address bar and highlight the **Submit** button on the virtual keyboard and press the **OK** button to visit the site.

Enter keyword/s into the search/address bar and highlight the **Submit** button on the virtual keyboard and press the **OK** button to start a search for the related websites.

Highlight a Speed Dial thumbnail and press the **OK** button to visit the related website.

Your TV is compatible with USB mice. Plug your mouse or wireless mouse adaptor into the USB input of your TV for easier and quicker navigation.

Some web pages include flash content. These are not supported by the browser.

Your TV does not support any download processes from the internet via the browser.

All sites on the internet might not be supported. According to the site; content problems may occur. In some circumstances video content might not be able to be played.

HBBTV System

HbbTV (Hybrid Broadcast Broadband TV) is a new industry standard that seamlessly combines TV services delivered via broadcast with services delivered via broadband and also enables access to Internet only services for consumers using connected TVs and set-top boxes. Services delivered through HbbTV include traditional broadcast TV channels, catch-up services, video-on-demand, electronic programme guide, interactive advertising, personalisation, voting, games, social networking and other multimedia applications.

HbbTV applications are available on channels where they are signalled by the broadcaster. The broadcaster marks one application as "autostart" and this one is started by the platform automatically. The autostart applications are generally launched with a small red button icon to notify the user that there is an HbbTV application on that channel. Press the red button to open the application page. After the page is displayed you can go back to the initial red button icon state by pressing the red button again. You can toggle between the red button icon mode and full UI mode of the application via pressing red button. It should be noted that the red button switching capability is provided by the application and some applications may behave differently (other colour buttons such as green, yellow, blue, may be defined for some other functions, e.g. shortcuts).

If you switch to another channel while an HbbTV application is active (either in red button icon mode or full UI mode), the following scenarios can occur.

• The application can continue running.

• The application can be terminated.

• The application can be terminated and another autostart red button application can be launched.

HbbTV allows the applications to be retrieved both from broadband or broadcast. The broadcaster may enable both ways or one of them. If the platform does not have an operational broadband connection, the platform can still launch applications transmitted on broadcast.

The autostart red button applications generally provide links to other applications. The user then can switch to other applications by using the links provided. The applications should provide a way to terminate themselves, usually **Exit** button is used for this.

HbbTV applications use keys on the remote control to interact with the user. When an HbbTV application is launched, the control of some keys are owned by the application. For example, numeric channel selection may not work on a teletext application where the numbers indicate teletext pages.

HbbTV requires AV streaming capability for the platform. There are numerous applications providing VOD (video on demand) and catch-up TV services. The user can use play, pause, stop, forward, and rewind keys on the remote control to interact with the AV content.

If you need to change the audio description settings of your TV you should do it before a HbbTV playback starts. You will not be able to access related settings during a playback. Go to the **Settings>System>Accessibility>Audio Description** menu and adjust according to your need.

*Note: You can enable or disable this feature from the **More** menu in **Settings>System** menu. Depending on the model of your TV and the selected country option in the First Time Installation this feature might be available in the **Settings>System>Privacy>Privacy Settings** menu instead of the **Settings>System>More** menu.*

Smart Center

Smart Center is a mobile application running on iOS and Android platforms. With your tablet or phone, you can easily stream your favourite live shows and programmes from your smart TV. Also; you can launch your applications, use your tablet as a remote control for your TV and share media files.

Note: Being able to use all functions of this application depends on the features of your TV.

Getting Started

To be able to use internet based features, your modem/router must be connected to the internet.

IMPORTANT: Make sure the TV and mobile device are connected to the same network.

For media sharing feature **Audio Video Sharing** option should be enabled (if available). Press the **Home** button on the remote, select **Settings>System>More** menu and press **OK**. Highlight **Audio Video Sharing** and change as **Enabled**. Your TV is ready to connect to your mobile device now.

Install the **Smart Center** application onto your mobile device.

Start the Smart Center application. If all connections are configured properly, you will see your TV's name on your mobile device. If your TV's name doesn't appear on the list, wait a while and tap on the **Refresh** widget. Select your TV from the list.

Mobile Device screen

On the main screen you can find tabs to access various features.

The application retrieves actual channel list from TV first when it starts.

MY CHANNELS: The programmes of the first four channels from the channel list retrieved from the TV are shown. You can change the listed channels. Press on the channel thumbnail and hold. A list of channels will be displayed and you can choose your desired channel to be replaced.

TV: You can watch content through the TV tab. In this mode you can navigate through the channel list retrieved from your TV and click on thumbnails to view the detail pages.

RECORDINGS: You can view your active recordings (if available) and reminders through this tab. To delete any item, simply press on the delete icon found on each row.

EPG(Electronic programme guide**):** You can view the broadcast schedules of selected channel lists through this tab. You can also navigate through channels by pressing on the selected channel on the EPG grid. Please note that updating / refreshing the EPG information may take a while depending on your network and web service quality.

Note: Internet connection is required for WEB based EPG information.

SETTINGS: Configure the application to your liking. You can change;

Auto-lock (Only in iOS): The screen of the device automatically turns off after a certain amount of time. Default is off, which means the screen will always stay on.

Auto-enable FollowMeTV: FollowMeTV function (if available) will start automatically when this setting is enabled. Default is disabled.

Auto-connection to TV: When enabled, your mobile device will automatically connect to last connected TV and skips the TV search screen.

Change TV (Only in iOS): Shows the currently connected TV. You can press on this setting to go to the "TV search" screen and change to a different TV.

Edit custom channel list: You can edit your custom channel list using this setting.

Choose channel list source: You can choose the channel list source to be used in the application. The options are "TV List" and "Custom List". Additionally you can activate "Remember my choice" option to set the selected channel list source as a constant choice. In this case if the selected source is available it will be used in the application.

Version No: Displays the current version of the application.

Detail Page

To open detail page tap on a programme. On the detail page screen you can get detailed information of the programmes you select. There are "Details", "Cast&Crew" and "Videos" tabs to find on this page.

DETAILS: This tab provides summary and information about the selected programme. Also there are links to Facebook and Twitter pages of the programme selected.

CAST&CREW: Shows all the people contributed to the current programme.

VIDEOS: Provides videos on YouTube related to the selected programme.

Note: For some functions an internet connection may be required.

FollowMe TV Feature (if available)

Tap on the **FOLLOW ME TV** widget located at the bottom left of the screen of your mobile device to change the layout for **FollowMe TV** feature.

Tap the play icon to start streaming of the content from the TV to your mobile device. Available if your device is in your router's operational range.

Mirror Mode

This mode of FollowMe TV feature is enabled by default and allows streaming the content from any other selected TV sources and Media Browser.

Notes: Note that only digital (DVB-T/C/S) SD and HD channels are supported.

Multilanguage audio support and subtitle on/off features are not functional.

The streaming performance may change depending on the quality of your connection.

Media Share Page

To access the **Media Share** widget tap on the **Up-arrow** on the bottom left side of the screen.

If the Media Share widget is pressed, a screen is displayed where you can select the media file type to share with your TV.

Note: Not all image file formats are supported. This function will not work if Audio Video Sharing feature is not supported.

Smart Remote Feature

You can use your mobile device as a remote control for your TV once it has connected to the TV. To use smart remote's full features tap on the **Up-arrow** on the bottom left side of the screen.

Voice Recognition

You can tap on the **Microphone( )** widget and manage your application, giving voice commands such as "Volume Up/Down!", "Programme Up/Down!".

Note: This feature is only available for android based devices.

Keyboard Page

The keyboard page can be opened in two ways; by pressing the **Keyboard( )** widget on the application screen or automatically by receiving a command from the TV.

Requirements

1. Smart TV

2. Network connection

3. Mobile device based on Android or iOS platform (Android OS 4.0 or higher; iOS 6 or higher version)

4. Smart Center app.(to be found on online application stores based on Android and iOS platforms)

5. Router modem

6. USB storage device in FAT32 format (required for USB Recording feature, if available)

Notes: For Android devices, Normal(mdpi), Large(hdpi) and Extra Large(xhdpi) screen sizes are supported. Devices with 3" or smaller screen sizes are not supported.

For iOS devices, all screen sizes are supported.

User interface of the Smart Center application is subject to change according to version installed on your device.

Alexa Ready

Alexa is Amazon's cloud-based voice service available on many voice controlled assistant devices. By means of the Alexa Built-in and Works With Alexa features you can use your TV as an Alexa device and control the functions of your TV with Alexa.

Alexa Built-in

You can use your TV as an Alexa device. In order to do this, a Microphone Box**(*)** will be required. After connecting your Microphone Box to your TV the setup process should be completed. The setup can be carried out in the ways described below.

(*) The Microphone Box can be purchased separately if not supplied with the TV. For more information contact your local dealer or retail outlet where you bought your TV.

• Connect your Microphone Box to your TV

• Use the **Alexa Built-in** option in the **Settings>System>Voice Assistant** menu

• Carry out first time installation on your TV. The setup wizard will be displayed after the installation process is completed

The wizard will guide you through the setup process. Refer to the user manual of the Microphone Box for detailed information.

Alexa Home Screen

Once the setup is complete, Alexa Home Screen feature will be integrated. This feature is an ambient screen which appears when no user activity is detected. A background image, time and date information and voice command suggestions will be displayed on the Alexa Home Screen.

You can use the **Alexa Home Screen** option in the **Settings>System>Voice Assistant>Alexa Built-in** menu to configure the settings of this feature. You can set to one of the inactivity periods to enable or set to **Off** to disable.

Alexa Home Screen is displayed only when web browser or any other video on demand application except Netflix is running. It appears when no user activity is detected during the predefined inactivity period unless a media playback is in progress. Watching a movie, for example, is not considered as user inactivity.

You can press remote control buttons to make it disappear. As an exception you can use the **Volume +/-** buttons to control volume level even when Alexa Home Screen is running.

Works With Alexa

You can control the functions of your TV with Alexa. In order to do this, the setup process should be completed. The setup can be carried out in the ways described below.

• Use the **Works With Alexa** option in the **Settings>System>Voice Assistant** menu

• Carry out first time installation on your TV. The setup wizard will be displayed after the installation process is completed

Setup process

The wizard will guide you through the setup process.

• If you carry out first time installation on your TV, the Alexa setup wizard will be displayed after the installation process is completed. On the first screen highlight **Learn More** option and press **OK**. On the next screen you will be informed about the feature. Highlight **Start** and press **OK** to proceed.

If you skip the setup wizard after the first time installation you can use the **Works With Alexa** option in the **Settings>System>Voice Assistant** menu to carry out the setup later manually. On the first screen you will be informed about the feature. Highlight **Start** and press **OK** to proceed.

• An authentication code will be created and displayed on the screen. Use your computer or any other device with internet access to go to the internet address (URL) shown on the screen. You will be directed to a page where you can sign in to your Amazon account first, if you are not already signed in. Then you will be directed to a page where you can enter the authentication code you see on the TV and link your TV to your Amazon account.

• If the linking process was successful you will be asked to determine a name for your TV, called 'Friendly Name'(**FN**). A 'Friendly Name' is a name that reminds you of your TV, such as 'Living Room TV', 'Kitchen TV', 'Dining Room TV', etc. Choose an easy-to-say name. You will say this name to tell Alexa which TV to control. When you are done, highlight **OK** and press **OK**.

- Examples about the use of the feature will be displayed on the next screen. Press **OK** to finish the setup.

  If you carried out the setup after the first time installation you will return to the first screen of the setup wizard when you press **OK**. In that case press **Exit** or highlight **Setup Later** and press **OK** in order to exit the setup.

Once the setup is complete, you will be able to control the functions of your TV with Alexa.

Note: Make sure that the devices are connected to the internet.

Example Commands

Here are some voice commands that you can use:

Command	Function
Alexa, turn on '**FN**'	Powers on the TV
Alexa, turn off '**FN**'	Powers off the TV
Alexa, play '**FN**'	Starts media playback
Alexa, pause '**FN**'	Pauses media playback
Alexa, resume '**FN**'	Resumes media playback
Alexa, stop '**FN**'	Stops media playback
Alexa, fast forward on '**FN**'	Advances media in fast forward mode
Alexa, rewind on '**FN**'	Rewinds media
Alexa, set the volume of '**FN**' to 50	Sets the volume to the specified level
Alexa, turn the volume up on '**FN**'	Increases volume by 10 units
Alexa, turn the volume down on '**FN**'	Decreases volume by 10 units
Alexa, mute '**FN**'	Mutes sound
Alexa, unmute '**FN**'	Unmutes sound
Alexa, change the input to "input_name" on '**FN**'	The TV switches to the input source with the specified name (e.g. HDMI 1)
Alexa, change channel to "channel_number" on '**FN**'	The TV switches to the channel with the specified number (e.g. channel 200)
Alexa, change channel to "channel_name" on '**FN**'	The TV switches to the channel with the specified name
Alexa, channel up on '**FN**'	The TV switches to the next higher channel, if any available
Alexa, channel down on '**FN**'	The TV switches to the next lower channel, if any available
Alexa, next channel on '**FN**'	The TV switches to the next channel on the channel list

FN is the abbreviation for 'Friendly Name'.

Google Assistant

Your TV works with Google Home for voice control of your connected devices and appliances.

Works With Google Home

By means of this feature you can control the functions of your TV with Google Assistant devices. In order to do this, the setup process should be completed.

Before the setup

Complete the following procedures before you start the setup on your TV.

- Install the Google Home application on your mobile phone and login to your account
- Add the assistant device to your account
- Select the **Vsmart TV** action from the list of actions within the application
- A screen will be displayed where you will enter the authentication code which will be created during the setup process on your TV in order to link your TV to your account. Continue with the setup on your TV to get the authentication code

Setup process

The setup can be carried out by using the **Google Assistant** option in the **Settings>System>Voice Assistant** menu. The wizard will guide you through the setup process.

- On the first screen highlight **Start** and press **OK** to proceed
- You will be asked to determine a name for your TV on the next screen, called 'Friendly Name' (**FN**). A 'Friendly Name' is a name that reminds you of your TV, such as 'Living Room TV', 'Kitchen TV', 'Dining Room TV', etc. Choose an easy-to-say name. When you are done, highlight **OK** and press **OK**
- An authentication code will be created and displayed on the screen. Enter the code you see on the TV on the Google Home application

Once the setup is complete, you will be able to control the functions of your TV with Google Assistant.

Note: Make sure that the devices are connected to the internet. You can link only one TV to your account.

Example Commands

Just say "Hey Google" or "Ok Google" to control your TV using just your voice.

Command	Function
turn on 'FN'	Powers on the TV
turn off 'FN'	Powers off the TV
pause on 'FN'	Pauses media playback
resume on 'FN'	Resumes media playback
stop on 'FN'	Stops media playback
volume up on 'FN'	Increases volume
volume down on 'FN'	Decreases volume
set mute volume on 'FN'	Mutes sound
switch input to "input_name" on 'FN'	The TV switches to the input source with the specified name (e.g. HDMI 1)
switch to "input_name" on 'FN'	
change channel to "channel_number" on 'FN'	The TV switches to the channel with the specified number (e.g. channel 200)
change channel to "channel_name" on 'FN'	The TV switches to the channel with the specified name
channel up on 'FN'	The TV switches to the next higher channel, if any available
channel down on 'FN'	The TV switches to the next lower channel, if any available

FN is the abbreviation for 'Friendly Name'.

DVB functionality information

This DVB receiver is only suitable for use in the country which it was designed to be used in.

Although this DVB receiver conforms to the latest DVB specifications at the time of manufacture, we cannot guarantee compatibility with future DVB transmissions due to changes that may be implemented in broadcast signals and technologies.

Some digital television functions may not be available in all countries.

We continually strive to improve our products; therefore, specifications may change without prior notice.

For advice on where to purchase accessories, please contact the store where you purchased your equipment.

For your own safety read the following instructions carefully before attempting to connect this unit to the mains supply.

MAINS (AC) OPERATION

The wires in the mains lead are coloured in accordance with the following code :

GREEN
&
YELLOW
(Earth)
(if there is earth cable)

FUSE

BROWN
(Live)

BLUE
(Neutral)
IMPORTANT

As the colours of the wires in the mains lead of this appliance may not correspond with the coloured markings identifying the terminals in your plug, proceed as follows:

The wire which is coloured green and yellow must be connected to the terminal which is marked with the letter E, or by the earth symbol, or coloured green or green and yellow.

The wire which is coloured blue or black must be connected to the terminal which is marked with the letter N or coloured Black.

The wire which is coloured brown or red must be connected to the terminal which is marked with the letter L or coloured Red.

For continued protection against risk of fire, replace only with same type and rating of fuse (ASTA approved 5A 250VAC fuse).

CAUTION

TO PREVENT ELECTRIC SHOCK DISCONNECT FROM THE MAINS BEFORE REMOVING COVER. NO USER SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

SAFETY PRECAUTION

THIS EQUIPMENT MUST BE DISCONNECTED FROM THE MAINS WHEN NOT IN USE. DO NOT ALLOW THIS UNIT TO BE EXPOSED TO RAIN OR MOISTURE.
